 Documentation of professional development is in several locations and may be easier to reorganize monitoring of it.
 Recommended maintenance monitoring plan be put in place as a result of a lot of physical plant violations. Director has been putting work order in for repairs and repairs are not being corrected in a reasonable time frame, especially for broken toilets and sinks. Work order for toilets was submitted in May 2025 and sinks in June 2025.
 Recommending technical assistance for director and reorganizing paperwork that seem to be difficult for director to monitor and locate.
 Multiple bathrooms are being used for storage. If this is the purpose of use, they will need to be removed from the license and that may affect program capacity. 1 toilet per 16 children. Change form required for change.
 Village room has strong urine order. Need local health approval to open room up for children.

NOTE: * Items left blank on this form were not monitored during this visit. * Only the regulations marked as compliant, non-compliant or not applicable were monitored or discussed. * It is the operator's responsibility to ensure compliance with all local codes and ordinances.
