DISCUSSIONS/COMMENTS

Prospective provider plans to care for children in the basement of the home. The provider lives on the main floor of the home. The area designated as a nap room does not yet have a second safe exit, but the provider plans on installing an appropriately-sized window that measures at least 20 inches wide by 24 inches tall. The provider understands that she cannot utilize the nap room until a second safe exit is in place and functional. The provider has agreed to send photographic evidence of a second safe exit to the licensing specialist once the second means of egress in the nap room has been established. In the meantime, there is sufficient space for children to nap in the main child care area. Prospective provider will utilize the paved outdoor areas as outdoor play space for the children. Discussed all regulations in detail and provided copies of OEC documents required for regulatory compliance. Prospective provider plans to hire a substitute or assistant. Regulations regarding nontransferability of license, responsibilities of substitutes, maximum capacity, and responsibilities of licensed providers were all discussed in detail. Discussed maintaining evidence of flu vaccination for all enrolled children between the ages of 6 months and 59 months by December 31 annually.

IMPORTANT NOTES

- It is the provider's responsibility to ensure compliance with all local codes and/or ordinances applicable to single and multi-family dwellings. This includes but is not limited to renovation, construction or expansion of the facility as well as the installation of a swimming pool or auxiliary heater.
- Only the regulations marked as compliant or non-compliant were monitored or discussed.
- **APPLICANTS** –You MAY NOT OPERATE until all requirements have been met and a license has been issued by the Agency.
