**DISCUSSIONS/COMMENTS**

Discussed with provider that if enrolled child's health assessment record states that the child needs rescue medication while in care, provider will need to have an authorization of medication form completed by both the child's physician and parent. Provider will also have to sign and date the bottom of the form. A care plan or asthma action plan will also need to be on file. In addition, rescue medication will have to be current and on site when the child is in care.

**IMPORTANT NOTES**

- \* It is the provider's responsibility to ensure compliance with all local codes and/or ordinances applicable to single and multi-family dwellings. This includes but is not limited to renovation, construction or expansion of the facility as well as the installation of a swimming pool or auxiliary heater.
- \* Only the regulations marked as compliant or non-compliant were monitored or discussed.
